COMPANY ANNOUNCEMENT

Errata Corrige

Audited Financial Statements

Of

SD Holdings Limited (Guarantor)

The following is a Company Announcement issued by SD Finance p.l.c. pursuant to the Listing Rules of the Listing Authority.

Quote

The Company makes reference to the Company Announcement SDA48 issued on the 30th July 2021, wherein the Company published the Accounts of SD Holdings Limited (the “Guarantor”).

The Company has been informed by the Board of Directors of the Guarantor that the Annual Report and Consolidated Financial Statements for the year ending 31st March 2021, as attached to the Company Announcement SDA48, did not include the final version of the Directors’ Report.

The Directors’ Report as published did not include the membership of Mr David Debono and Mr Alan Debono. Additionally, within the Directors’ report under the heading: Results and Dividends, the Group in the financial year 2021 had retained an earning of €40,344,641 and not as shown in the report of €39,909,845.

The Company has been informed by the Board of Directors of the Guarantor that the correct Group figures for the financial year 2021 of Retained Earnings at €40,344,641 is correctly stated in the Statements of Financial Position and Statements of Changes of Equity of the Group in the published results.

The Company is enclosing a revised set of Audited Financial Statements for the year ending 31st March 2021 of the Guarantor with the correct Directors' Report.

Directors' report

The directors present their report and the audited financial statements for the year ended 31 March 2021.

Principal activities

The company's principal activity is that of holding investments.

The group operates in the local market and predominantly in hospitality, leisure and catering activities. It operates and owns two hotels: the db Seabank Resort & SPA situated at Ghadira Bay Mellieha and the db San Antonio Hotel & SPA situated in Bugibba. It also operates and owns the restaurant amenities at the Adeera Complex in Mellieha Bay, AKI Restaurant in Valletta, Nine Lives in Bugibba and operates outlets under the *Hard Rock Café* franchise and the *Starbucks* franchise.

The group also holds investments in associates which provide healthcare and catering services to hospitals and retirement homes and associates which provide catering services primarily to Air Malta and other airlines operating from Malta. Other associated investments operate in the hospitality and catering industries.

Review of business

The COVID-19 pandemic materially impacted the Group's performance for 2021 as was the case all over the world, especially in the hospitality, leisure and catering sectors. Accommodation and catering outlets were severely disrupted at different stages of the year, with various restrictions imposed by the Health Authorities during times of operation.

Total revenue for the group during the year under review reached €17.3 million resulting in a year on year decrease of €42 million (-70.9%). The decrease in revenue reflected itself in earnings before interest, tax, depreciation and amortisation (EBITDA) factoring in at €5.6 million as against €27.6 million registered for 2020 (-79.7%). These results brought down the margin of profit or return on turnover generated to 32%, when compared to 47% during 2020. Given the pandemic situation, these results are encouraging and came about following various measures taken by the Group to keep its costs in check. Additionally, Government payroll grants received cushioned the effect on employee benefit expense while retaining most its employees.

Consequently, the year 2021 resulted in a loss after tax of €2.1 million when compared to a net profit of €12.2 million the previous year. The overall hotel portfolio occupancy dropped down to 15% when compared to 81% in 2020 and this is hardly surprising when both hotels had to close for two separate periods during the year. Seabank was closed between April and June 2020 and between November 2020 and March 2021, while San Antonio was closed between April and June of last year. This was further accentuated by the substantial curtailment of flights flying into Malta and with the Malta International Airport closed for the first two months of the financial year.

Meanwhile the food and beverage sector also experienced lower turnover figures, however, the drop was moderate when compared to accommodation. Turnover for the year reached €8.2 million (€ 14.1 million in 2020) and now includes a new restaurant in Valletta and the Starbucks outlet in Bugibba. Merchandise turnover also experienced a sharp drop of around 74% on a year-on-year basis and this was mainly due to the closure of Hard Rock outlet at Baystreet, which to date has not yet been replaced together with a lack of cruise liner business and passenger throughput at the airport.

The group's balance sheet value now factors in at €328 million as against a comparative of €325 million in 2020. The group's equity base saw it decreasing by €6.1 million which is a direct result of the net loss of €2.1 million and dividends of €4 million. As a result, the group's gearing ratio factored in at 27.9% as against 25.9% for 2020.

Directors' report - continued

The interest rate cover now stands at 1 multiple against a 7 multiple in the prior year mainly as a result of lower revenues of €42 million when compared to previous year.

Given the size of the group and its dependence on the local economy, the group recognises that the main risks and uncertainty to its business is the potential downturn in the local economy with particular reference to the tourism and services industry.

Outlook for the financial year ending 2022

The COVID-19 pandemic is continuing to wreak havoc in the accommodation and leisure components of the industry. Following the opening of international travel in July 2021, a surge of new cases was experienced in Malta and abroad which somehow stifled bookings and travelling. However, what is encouraging is that while cases increased exponentially, not so where hospital admissions in countries where vaccination uptake is high among its population. This is the case in Malta. The authorities are doing their utmost to have a high percentage of its population inoculated as this is one way of making sure that this pandemic remains under control. Additional measures in place at the points of entry in the country will also keep any potential new cases in check.

We are encouraged, however, to note that as at the date that these financial statements have been authorised for issue, all the business units of the Group are back in business and fully operational within the restrictions and guidelines issued by the Health Authorities.

The Group is looking at a moderate improvement in accommodation bookings in the following months which is expected to improve as the months go by thus returning to profitability by the end of the financial year. On the other hand, results from our catering establishments are more upbeat and encouraging. The situation is expected to improve with the advent of more incoming tourists and the gradual easing of health-related restrictions. The Group expects to be opening up additional Starbucks units bringing the total in operation up to ten by the end of the current fiscal year. A further two restaurants are also due to open during the course of this year. Suffice to say that all employees are now back on a 40-hour working week. The Maltese Government continues to respond with monetary and fiscal interventions to assist companies to overcome these unprecedented financial difficulties.

Conversely, the pandemic had the opposite effect on the health care arm of the Group. An upswing in demand for the services offered by the Group within this sector was experienced which somehow mitigated to a lesser extent the negative effects experienced within the hospitality and leisure arm of the Group's business model. Moreover, the opening in July 2020 of the new 504-bed wing at the Saint Vincent de Paul Residence which will be run and managed by one of the Group's associated companies, helped to mitigate the negative impact experienced in other sectors within the Group.

The Group has prepared projections for the coming three years, based on historical financial information and forecasts, but factoring in the gradual return to normality following the mayhem created by the COVID-19 pandemic. The Group has over the past years accumulated a substantial cash reserve which as at year end amounted to €32 million. The Group also utilised a €10 million loan under the MDB COVID-19 Guarantee scheme to mitigate against its working capital needs and at the same time cushioning the effect of any prolongment in its receivables cycle. The projections contemplate the existence of a significant liquidity buffer at the end of the year notwithstanding the expected adverse financial results. The Directors feel confident that with the measures taken and the secured financing arrangements, Group shall overcome the disruptions brought about by this pandemic. On this basis, the directors are of the opinion that the going concern assumption in the preparation of these consolidated financial statements is considered appropriate and there are no material uncertainties which may cast significant doubt about the ability of the Group to continue operating as a going concern.

Directors' report - continued

Outlook for the financial year ending 2022 - continued

Amid the disruptions faced by the Group as noted above, SD Finance p.l.c. (the Issuer of the bonds) still paid its bondholders the full interest that was due in April 2021. Furthermore, it should be noted that in view of the measures undertaken by the Group, the projections outlined above and the cash reserves accumulated by the Group in the past years, the directors are of the opinion that the Issuer will have the necessary funds to finance the interest falling due in April 2022 and going forward.

Financial risk management

The group's and company's activities expose them to a variety of financial risks, including market risk (including currency risk, fair value interest rate risk and cash flow interest rate risk), credit risk and liquidity risk. Refer to Note 2 in these financial statements.

Results and dividends

The consolidated financial results are set out on page 13. The directors have declared a net dividend of €4,000,000 (2020: NIL).

Retained earnings carried forward at the end of the financial reporting period for the group and the company amounted to €40,344,641 (2020: €46,326,706) and €16,602,309 (2020: €19,940,588).

Directors

The directors of the company who held office during the year were:

Silvio Debono
Arthur Gauci
Robert Debono
Alan Debono
David Debono
Victoria Debono
Vincent Degiorgio
Jesmond Vella

The company's Articles of Association do not require the directors to retire.

Directors' report - continued

Statement of directors' responsibilities for the financial statements

The directors are required by the Maltese Companies Act (Cap.386) to prepare financial statements which give a true and fair view of the state of affairs of the group and the parent company as at the end of each financial period and of the profit or loss for that period.

In preparing the financial statements, the directors are responsible for:

- ensuring that the financial statements have been drawn up in accordance with International Financial Reporting Standards as adopted by the EU;
- selecting and applying appropriate accounting policies;
- making accounting estimates that are reasonable in the circumstances;
- ensuring that the financial statements are prepared on the going concern basis unless it is inappropriate to presume that the group and the parent company will continue in business as a going concern.

The directors are also responsible for designing, implementing and maintaining internal control relevant to the preparation and the fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error, and that comply with the Maltese Companies Act (Cap.386). They are also responsible for safeguarding the assets of the group and the parent company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The financial statements of SD Holdings Limited for the year ended 31 March 2021 are included in the Annual Report and Consolidated Financial Statements 2021, which is published in hard-copy printed form and made available on the group's website. The directors of the entities constituting the db group are responsible for the maintenance and integrity of the Annual Report on the website in view of their responsibility for the controls over, and the security of, the website. Access to information published on the group's website is available in other countries and jurisdictions, where legislation governing the preparation and dissemination of financial statements may differ from requirements or practice in Malta.

Auditors

PricewaterhouseCoopers have indicated their willingness to continue in office and a resolution for their re-appointment will be proposed at the Annual General Meeting.

Independent auditor's report

To the Shareholders of SD Holdings Limited

Report on the audit of the financial statements

Our opinion

In our opinion:

- The Group financial statements and Parent Company financial statements (the “financial statements”) give a true and fair view of the Group’s and the Parent Company’s financial position of SD Holdings Limited as at 31 March 2021, and of the Group’s and the Parent Company’s financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (‘IFRSs’) as adopted by the EU; and
- The financial statements have been prepared in accordance with the requirements of the Maltese Companies Act (Cap. 386).

What we have audited

SD Holdings Limited’s financial statements, set out on pages 11 to 70, comprise:

- the Consolidated and Parent Company statements of financial position as at 31 March 2021;
- the Consolidated and Parent Company income statements and statements of comprehensive income for the year then ended;
- the Consolidated and Parent Company statements of changes in equity for the year then ended;
- the Consolidated and Parent Company statements of cash flows for the year then ended; and
- the notes to the financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor’s Responsibilities for the Audit of the Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group and the Parent Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) together with the ethical requirements of the Accountancy Profession (Code of Ethics for Warrant Holders) Directive issued in terms of the Accountancy Profession Act (Cap. 281) that are relevant to our audit of the financial statements in Malta. We have fulfilled our other ethical responsibilities in accordance with these Codes.

Independent auditor's report - continued

To the Shareholders of SD Holdings Limited

Emphasis of matter

We draw attention to Note 1.1 to these financial statements that explains the impact of COVID-19 on the Group's operations and to Note 4 to these financial statements that describes the related uncertainties on the Group's property valuations as at 31 March 2021 and the related uncertainties in this regard. These matters are considered to be of fundamental importance to the understanding of the financial statements due to its nature and significance. Our opinion is not modified in respect of these matters.

Other information

The directors are responsible for the other information. The other information comprises the Directors' report and the db Group Annual report (but does not include the financial statements and our auditor's report thereon).

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon except as explicitly stated within the *Report on other legal and regulatory requirements*.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Responsibilities of the directors for the financial statements

The directors are responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs as adopted by the EU and the requirements of the Maltese Companies Act (Cap. 386), and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent auditor's report - continued

To the Shareholders of SD Holdings Limited

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's or the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Group's or the Parent company's ability to continue as a going concern. In particular, it is difficult to evaluate all of the potential implications that COVID-19 will have on the Group's and the Parent company's trade, customers and suppliers, and the disruption to their business and the overall economy.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Independent auditor's report - continued

Notes to the financial statements

1. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

1.1 Basis of preparation

In view of the current situation brought about by the COVID-19 pandemic, which was the primary factor leading to the loss for the year, the Group has prepared projections for the coming three years based on historical financial information and forecasts, but factoring in the gradual return to normality following the mayhem created by the COVID-19 pandemic. The Group has over the past years accumulated a substantial cash reserve which as at year end amounted to €32 million. The Group also utilised a €10 million loan under the MDB COVID-19 Guarantee scheme to mitigate against its working capital needs and at the same time cushioning the effect of any prolongment in its receivables cycle.

Given the group's strong cash reserve and a solid equity position resulting in a gearing ratio 27.8% as at 31 March 2021, the directors have concluded that the Group will be able to meet its commitments both financial and otherwise. Consequently, the Group's obligations to bondholders should be met in full as well, whereby the payment of bond interest falling due in April 2021 has been settled already.

On this basis, the directors have assessed that the Group is expected to have the necessary funds to finance its operations and commitments towards employees, creditors, banks and bondholders. Accordingly, the board continues to adopt the going concern basis in preparing the Group's financial statements and considers that there are no material uncertainties which may cast significant doubt about the ability of the Group to continue operating as a going concern.

These financial statements have been prepared in accordance with the requirements of International Financial Reporting Standards (IFRSs) as adopted by the EU and with the requirements of the Maltese Companies Act (Cap. 386). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of land and buildings.

The preparation of financial statements in conformity with IFRSs as adopted by the EU requires the use of certain accounting estimates. It also requires directors to exercise their judgment in the process of applying the Company's accounting policies (see Note 3 – Critical accounting estimates and judgments).

Standards, interpretations and amendments to published standards effective during the current financial year

During the current financial year, the company adopted new standards, amendments and interpretations to existing standards that are mandatory for the company's accounting period beginning on 1 April 2020. The adoption of these revisions to the requirements of IFRSs as adopted by the EU did not result in substantial changes to the company's accounting policies, not impacting the Group's financial performance and position.

1. Summary of significant accounting policies - continued

1.1 Basis of preparation - continued

Standards, interpretations and amendments to published standards that are not yet adopted

Certain new standards, amendments and interpretations to existing standards have been published by the date of authorisation for issue of these financial statements but are mandatory for the group's accounting periods beginning after 1 April 2020. The group has not early adopted these revisions to the requirements of IFRSs as adopted by the EU, and the group's directors are of the opinion that, except as disclosed below, there are no requirements that will have a possible significant impact on the group's financial statements in the period of initial application.

1.2 Consolidation

(a) Subsidiaries

Subsidiary undertakings are all entities over which the group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are de-consolidated from the date that control ceases.

The group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognised in profit or loss.

Any contingent consideration to be transferred by the group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with IAS 39 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

1. Summary of significant accounting policies - continued

1.2 Consolidation - continued

(a) Subsidiaries - continued

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the income statement.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

In the company's separate financial statements, investments in subsidiaries are accounted for by the cost method of accounting. Provisions are recorded where, in the opinion of the directors, there is a long-term impairment in value. Where there has been a permanent diminution in the value of an investment, it is recognised as an expense in the period in which the diminution is identified. The results of subsidiaries are reflected in the company's separate financial statements only to the extent of dividends receivable. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to profit or loss.

(b) Associates

Associates are all entities over which the group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. In the consolidated financial statements, investments in associates are accounted for using the equity method of accounting and are initially recognised at cost. The group's investment in associates includes goodwill (net of any accumulated impairment losses) identified on acquisition (refer to accounting policy note 1.6[a] – Intangible assets).

The group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the group and its associates are eliminated to the extent of the group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the group.

In the company's separate financial statements, investments in associates are accounted for by the cost method of accounting. Provisions are recorded where, in the opinion of the directors, there is a long-term impairment in value. Where there has been a permanent diminution in the value of an investment, it is recognised as an expense in the period in which the diminution is identified. The results of associates are reflected in the company's separate financial statements only to the extent of dividends receivable. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to profit or loss.

1. Summary of significant accounting policies - continued

1.3 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The euro is the group's functional and presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

1.4 Property, plant and equipment

All property, plant and equipment is initially recorded at historical cost. Land and buildings are subsequently shown at fair value, based on periodic valuations by professional valuers, less subsequent depreciation for buildings. Valuations are carried out on a regular basis such that the carrying amount of property does not differ materially from that which would be determined using fair values at the end of the reporting period. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset. All other property, plant and equipment is subsequently stated at historical cost less depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Borrowing costs which are incurred for the purpose of acquiring or constructing a qualifying asset are capitalised as part of its cost (Note 1.23).

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of land and buildings are credited to other comprehensive income and shown as a revaluation reserve in shareholders' equity. Decreases that offset previous increases of the same asset are charged in other comprehensive income and debited against the revaluation reserve; all other decreases are charged to profit or loss. Each year the difference between depreciation based on the revalued carrying amount of the asset (the depreciation charged to profit or loss) and depreciation based on the asset's original cost, net of any related deferred income taxes, is transferred from the revaluation reserve to retained earnings.

Depreciation is calculated using the straight-line method to allocate the cost or revalued amounts of the assets to their residual values over their estimated useful lives, as follows:

	%
Buildings	1 - 3
Computer equipment	20 - 33.33
Furniture, fixtures and fittings	6.67 - 10
Motor vehicles	20
Plant, machinery and operational equipment	6.67 - 15

Freehold land is not depreciated as it is deemed to have an indefinite life. Leasehold land is amortised on a straight-line basis over the period of the lease.

1. Summary of significant accounting policies - continued

1.4 Property, plant and equipment - continued

Assets in the course of construction and payments on account are not depreciated. Depreciation will commence once the respective assets are commissioned for their intended use.

No depreciation is charged on linen, crockery, cutlery and glassware. Normal replacements are charged to profit or loss.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 1.7).

Gains and losses on disposals of property, plant and equipment are determined by comparing proceeds with carrying amount and are recognised in profit or loss. When revalued assets are disposed of, the amounts included in the revaluation reserve relating to the assets are transferred to retained earnings.

1.5 Investment property

Investment property comprises leasehold property acquired during 2017.

The group adopts the cost model under IAS 40, 'Investment property', whereby investment property is stated in the statement of financial position at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Borrowing costs which are incurred for the purpose of acquiring or constructing a qualifying investment property are capitalised as part of its cost. Borrowing costs are capitalised while acquisition or construction is actively underway. Capitalisation of borrowing costs is ceased once the asset is substantially complete and is suspended if the development of the asset is suspended.

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to profit or loss during the financial period in which they are incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Investment property consists of land which is not depreciated as it is deemed to have an indefinite life. Useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

A property's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 1.7).

Investment properties are derecognised either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Gains and losses on disposals are determined by comparing the proceeds with carrying amount and are recognised in profit or loss.

1. Summary of significant accounting policies - continued

1.5 Investment property - continued

If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment. Its cost and accumulated amortisation at the date of the reclassification becomes its cost and accumulated depreciation for subsequent accounting purposes. When the group decides to dispose of an investment property without development, the group continues to treat the property as an investment property. Similarly, if the group begins to redevelop an existing investment property for continued future use as investment property, it remains an investment property during the redevelopment.

If an item of property, plant and equipment becomes an investment property because its use has changed, its cost and accumulated depreciation at the date of the reclassification becomes its cost and accumulated amortisation for subsequent accounting purposes.

Where an investment property undergoes a change in use, evidenced by commencement of development with a view to sale, the property is transferred to inventories. A property's deemed cost for subsequent accounting as inventories is its carrying amount at the date of change in use.

1.6 Intangible assets

(a) Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the group's share of the net identifiable assets of the acquired subsidiary/associate at the date of acquisition. Goodwill on acquisitions of subsidiaries is included in 'Intangible assets'. Goodwill on acquisitions of associates is included in 'Investments in associates'. Separately recognised goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. A cash-generating unit to which goodwill has been allocated shall be tested for impairment annually, and whenever there is an indication that the unit may be impaired by comparing the carrying amount of the unit, including the goodwill, with the recoverable amount of the unit. The recoverable amount is the higher of fair value less costs to sell and value in use.

(b) Franchise rights

Franchise rights are shown at historical cost. Franchise rights have a finite useful life and are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method to allocate the cost of franchise rights over their estimated useful lives.

Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

1. Summary of significant accounting policies - continued

1.7 Impairment of non-financial assets

Assets that have an indefinite useful life are not subject for amortisation and are tested annually for impairment. Assets that are subject for amortisation or depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered an impairment is reviewed for possible reversal of the impairment at the end of each reporting period.

1.8 Financial assets

Classification

The group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those to be measured at amortised cost.

The classification depends on the group's business model for managing the financial assets and the contractual terms of the cash flows. For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income (OCI). For investments in equity instruments that are not held for trading, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The group reclassifies debt investments when and only when its business model for managing those assets changes.

Recognition and derecognition

The group recognises a financial asset in its statement of financial position when it becomes a party to the contractual provisions of the instrument.

Regular way purchases and sales of financial assets are recognised on settlement date, the date on which an asset is delivered to or by the group. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership or has not retained control of the asset.

1. Summary of significant accounting policies - continued

1.8 Financial assets - continued

Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

(a) Debt instruments

Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the group may classify its debt instruments:

- **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss. Impairment losses are presented as a separate line item in the statement of profit or loss.
- **FVOCI:** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss. Interest income from these financial assets is included in finance income using the effective interest rate method. Impairment losses are presented as a separate line item in the statement of profit or loss.
- **FVPL:** Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss in the period in which it arises.

(b) Equity instruments

The group subsequently measures all equity investments at fair value. Where the group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss when the group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in the income statement as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

1. Summary of significant accounting policies - continued

1.8 Financial assets - continued

Impairment

The group assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables and contract assets, the group applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables (see Note 2 for further details).

1.9 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined by the weighted average cost method. Cost is the invoiced value of goods and, in general, includes transport and handling costs. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

1.10 Trade and other receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less expected credit loss allowances.

Trade and other receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognised at fair value. The group holds the trade and other receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method.

1.11 Cash and cash equivalents

Cash and cash equivalents are carried in the statement of financial position at face value. Cash and cash equivalents include cash in hand, deposits held at call with banks and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the statement of financial position.

1.12 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

1.13 Financial liabilities

The group recognises a financial liability in its statement of financial position when it becomes a party to the contractual provisions of the instrument. The group's financial liabilities are classified as financial liabilities which are not at fair value through profit or loss (classified as 'Other liabilities') under IFRS 9. Financial liabilities not at fair value through profit or loss are recognised initially at fair value, being the fair value of consideration received, net of transaction costs that are directly attributable to the acquisition or the issue of the financial liability. These liabilities are subsequently measured at amortised cost. The group derecognises a financial liability from its statement of financial position when the obligation specified in the contract or arrangement is discharged, is cancelled or expires.

1. Summary of significant accounting policies - continued

1.14 Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities. Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

1.15 Borrowings

Borrowings are recognised initially at the fair value of proceeds received, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method. Borrowings are classified as current liabilities unless the group has an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.

1.16 Deferred Government grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the group will comply with all attached conditions. Government grants related to costs are deferred and recognised in profit or loss over the period necessary to match them with the costs they are intended to compensate.

Government grants related to assets, i.e. in respect of the purchase of property, plant and equipment, are included in liabilities as deferred government grants, and are credited to profit or loss on a straight-line basis over the expected lives of the related assets, presented within 'Other operating income'.

Grants related to income are presented as a deduction in reporting the related expense.

1.17 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

1.18 Derivative financial instruments and hedging

Derivative financial instruments include interest rate swap agreements and are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative. That portion of hedging derivatives which is expected to be realised within 12 months of the reporting date is presented as current; the remainder of the derivative is presented as non-current. The company does not hold any trading derivatives.

1. Summary of significant accounting policies - continued

1.19 Current and deferred tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Deferred tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred tax liability is settled.

Deferred tax on the fair valuation of property, plant and equipment is charged or credited directly to the revaluation reserve. Deferred tax on the difference between the actual depreciation on the asset and the equivalent depreciation based on the historical cost of the asset is realised through profit or loss.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

1.20 Revenue recognition

Revenues include all revenues from the ordinary business activities of the group. Ordinary activities do not only refer to the core business but also to other recurring sales of goods or rendering of services. Revenues are recorded net of value added tax. The group's business principally comprises sales of goods and services in the hospitality industry.

(a) Sale of goods and services

Revenues are recognised in accordance with the provision of goods or services, provided that collectability of the consideration is probable.

IFRS 15 requires that at contract inception the goods or services promised in a contract with a customer are assessed and each promise to transfer to the customer the good or service is identified as a performance obligation. Promises in a contract can be explicit or implicit if the promises create a valid expectation to provide a good or service based on the customary business practices, published policies, or specific statements.

A contract asset must be recognised if the group's recorded revenue for fulfillment of a contractual performance obligation before the customer paid consideration or before – irrespective of when payment is due – the requirements for billing and thus the recognition of a receivable exist.

A contract liability must be recognised when the customer paid consideration or a receivable from the customer is due before the group fulfilled a contractual performance obligation and thus recognised revenue.

1. Summary of significant accounting policies - continued

1.20 Revenue recognition - continued

Multiple-element arrangements involving the delivery or provision of multiple products or services must be separated into distinct performance obligations, each with its own separate revenue contribution that is recognised as revenue on fulfillment of the obligation to the customer. The total transaction price of a bundled contract is allocated among the individual performance obligations based on their relative – possibly estimated – standalone selling prices, i.e., based on a ratio of the standalone selling price of each separate element to the aggregated standalone selling prices of the contractual performance obligations.

IFRS 15 provides more detailed guidance on how to account for contract modifications. Changes must be accounted for either as a retrospective change (creating either a catch up or deferral of previously recorded revenues), prospectively with a reallocation of revenues amongst identified performance obligations, or prospectively as separate contracts which will not require any reallocation.

Sales from hospitality and ancillary services

Revenue from services is generally recognized in the accounting period in which the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided. Revenue arising from hospitality activities is recognised when the service is performed and/or when the goods (primarily food and beverage relating restaurant and bar sales) are supplied upon performance of the service. Revenue is usually in cash, credit card or on credit.

A group undertaking also operates a number of rooms on a timeshare basis. In the case of timeshare, customers buy the right to a slot in a given time period, for which the customer must make an up-front payment. Subsequently, the customer must also make annual contributions to the scheme to cover the share of maintenance costs. The customers get the benefits (i.e. control over the promise) with every passing day of each year's stay at the vacation apartment/suite. The revenue stream therefore meets the conditions for revenue recognition over time (i.e. stage of completion), and revenue is accordingly recognised on a daily basis of accommodation.

Sales of goods – retail

Sales of goods are recognized when the group has delivered products to the customer and there are no unfulfilled obligations that could affect the customer's acceptance of the products. Delivery does not occur until the risks of obsolescence and loss have been transferred to the customer and the customer has accepted the products. Retail sales are usually in cash or by credit card.

Financing

The group does not expect to have material contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the group does not adjust any of the transaction prices for the time value of money.

(a) Interest income

Interest income is recognised in profit or loss for all interest-bearing instruments as it accrues using the effective interest method.

(c) Dividend income is recognised when the right to receive payment is established.

(d) Other operating income is recognised on an accrual basis unless collectibility is in doubt.

1. Summary of significant accounting policies - continued

1.21 Customer contract assets and liabilities

The timing of revenue recognition may differ from customer invoicing. Trade receivables presented in the statement of financial position represent an unconditional right to receive consideration (primarily cash), i.e. the services and goods promised to the customer have been transferred.

By contrast, contract assets mainly refer to amounts allocated per IFRS 15 as compensation for goods or services provided to customers for which the right to collect payment is subject to providing other services or goods under that same contract. Contract assets, like trade receivables, are subject to impairment for credit risk. The recoverability of contract assets is also verified, especially to cover the risk of impairment should the contract be interrupted.

Contract liabilities represent amounts paid by customers before receiving the goods and/or services promised in the contract. This is typically the case for advances received from customers or amounts invoiced and paid for goods or services not transferred yet.

1.22 Operating and finance leases

(a) Operating leases – where group undertakings are the lessee

IFRS 16 requires an entity to assess whether a contract is, or contains, a lease at the inception date. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for a consideration. Leases are recognised as a right-of-use asset and a corresponding liability at the commencement date, being the date at which the leased asset is available for use by the Company.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Group using residual value guarantees;
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option; and
- payment of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for lessees, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

1. Summary of significant accounting policies - continued

1.22 Operating and finance leases - continued

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received; and
- makes adjustments specific to the lease, term and security.

Lease payments are allocated between principal and finance cost. The finance cost is computed so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Finance costs are recognised in profit or loss over the lease period.

Right-of-use assets are initially measured at 'cost' which, where applicable, comprises the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;
- any initial direct costs; and
- restoration costs.

Right-of-use assets are subsequently measured at cost, less accumulated depreciation and any accumulated impairment losses, except as highlighted below. Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. Depreciation is recognised in profit or loss.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

(b) Operating leases – where a group undertaking is the lessor

Assets leased out under operating leases are included in property, plant and equipment in the statement of financial position and are accounted for in accordance with accounting policy 1.4. They are depreciated over their expected useful lives on a basis consistent with similar owned property, plant and equipment. Rental income from operating leases is recognised in profit or loss on a straight-line basis over the lease term and is presented within 'Other operating income'.

(c) Finance leases – where a group undertaking is the lessor

When assets are leased out under a finance lease, the lower of the fair value of the leased asset and the present value of the minimum lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income.

Lease income is recognised over the term of the lease using the net investment method which reflects a constant periodic rate of return.

1. Summary of significant accounting policies - continued

1.23 Borrowing costs

Borrowing costs which are incurred for the purpose of acquiring or constructing qualifying property, plant and equipment and investment property are capitalised as part of its cost. Borrowing costs are capitalised while acquisition or construction is actively underway, during the period of time that is required to complete and prepare the asset for its intended use. Capitalisation of borrowing costs is ceased once the asset is substantially complete and is suspended if the development of the asset is suspended. All other borrowing costs are expensed. Borrowing costs are recognised for all interest-bearing instruments on an accrual basis using the effective interest method. Interest costs include the effect of amortising any difference between initial net proceeds and redemption value in respect of the group's interest-bearing borrowings. Such instruments matured during the current year.

1.24 Dividend distribution

Dividend distribution to the parent company's shareholders is recognised as a liability in the financial statements in the period in which the dividends are approved by the shareholders.

2. Financial risk management

2.1 Financial risk factors

The group's activities potentially expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk and cash flow interest rate risk), credit risk and liquidity risk. The group's overall risk management, covering risk exposures for all subsidiaries, focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the group's financial performance. The parent company's directors provide principles for overall group risk management, as well as policies covering risks referred to above and specific areas such as investment of excess liquidity. The group undertakings did not make use of derivative financial instruments during the current and preceding financial years.

(a) Market risk

(i) Foreign exchange risk

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities which are denominated in a currency that is not the entity's functional currency. A portion of the group's purchases are denominated in US dollar. Balances denominated in foreign currencies are settled within very short periods in accordance with the negotiated credit terms. Also, foreign exchange risk attributable to future transactions is not deemed to be material since the group undertaking manages the related risk by reflecting, as far as is practicable, the impact of exchange rate movements registered with respect to purchases in the respective sales prices.

The group's revenues, purchases and other expenditure, financial assets and liabilities, including financing, are mainly denominated in euro except as outlined above. Management does not consider foreign exchange risk attributable to recognised liabilities arising from purchase transactions denominated in US dollar to be significant. Accordingly, a sensitivity analysis for foreign exchange risk disclosing how profit or loss and equity would have been affected by changes in foreign exchange rates that were reasonably possible at the balance sheet date is not deemed necessary.

(ii) Fair value interest rate risk

The group's significant instruments which are subject to fixed interest rates represent the bonds issued to the general public (Note 18). The company's fixed interest instrument also comprise the loan from subsidiary (Note 18). In this respect, the group and the company are potentially exposed to fair value interest rate risk in view of the fixed interest nature of these instruments, which are however measured at amortised cost.

2. Financial risk management – continued

2.1 Financial risk factors - continued

(iii) Cash flow interest rate risk

For the company the cash flow interest rate risk principally arises from amounts owed by subsidiary subject to variable rates (refer to Note 18). The interest expense arising from the borrowings is on the same lines of the interest income from the receivables. Accordingly, the company is not exposed to cash flow interest rate risk.

The group's interest rate risk principally arises from bank borrowings issued at variable rates (Note 18) which expose the group to cash flow interest rate risk. Management monitors the impact of changes in market interest rates on borrowing costs in respect of these liabilities. Based on this analysis, management considers the potential impact on profit or loss of a defined interest rate shift that is reasonably possible at the balance sheet date to be immaterial and accordingly the level of interest rate risk is contained. The group's operating cash flows are substantially independent of changes in market interest rates.

(b) Credit risk

Credit risk arises from cash and cash equivalents and credit exposures to customers, including outstanding debtors and committed transactions. The group's exposures to credit risk as at the end of the reporting periods are analysed as follows:

	Group		Company	
	2021	2020	2021	2020
	€	€	€	€
Financial assets measured at amortised cost:				
Trade and other receivables (Note 11)	4,839,613	7,191,350	28,785,696	19,096,337
Cash and cash equivalents (Note 13)	31,582,081	24,360,832	26,502,324	20,344,084
	36,421,694	31,552,182	55,288,020	39,440,421

The maximum exposure to credit risk at the reporting date in respect of the financial assets mentioned above is equivalent to their carrying amount as disclosed in the respective notes to the financial statements. The group does not hold any collateral as security in this respect. The figures disclosed above in respect of trade and other receivables exclude advance payments to suppliers, indirect taxation and prepayments.

Cash and cash equivalents

The group's cash and cash equivalents are held with local financial institutions with high quality standing or rating or nothing and are due to be settled on demand. Management considers the probability of default to be close to zero as the financial institutions have a strong capacity to meet their contractual obligations in the near term. As a result, while cash and cash equivalents are subject to the impairment requirements of IFRS 9, the identified impairment loss is insignificant.

2. Financial risk management - continued

2.1 Financial risk factors - continued

Trade receivables (including contract assets)

The group assesses the credit quality of its customers taking into account financial position, past experience and other factors. It has policies in place to ensure that sales of goods and services are effected to customers with an appropriate credit history. The group monitors the performance of its receivables on a regular basis to identify incurred collection losses, which are inherent in the group's debtors, taking into account historical experience in collection of accounts receivable.

In view of the nature of the group's activities and the market in which it operates, a limited number of customers account for a certain percentage of the group's trade receivables. Whilst no individual customer or group of dependent customers is considered by management as a significant concentration of credit risk with respect to trade debts, these exposures are monitored and reported more frequently and rigorously. These customers trade frequently with the respective group undertaking and are deemed by management to have excellent credit standing, usually taking cognisance of the performance history without defaults.

The group manages credit exposures actively in a practicable manner such that amounts receivable are within controlled parameters. The credit quality of the group's receivables, which are not impaired or past due financial assets, reflects the nature of these assets which are principally debts in respect of transactions with counterparties for whom there is no history of default. Management does not expect any losses from non-performance by these parties. As at 31 March 2021, the group holds collateral in the form of bank guarantees for an amount of €1,000,000 (2020: €1,000,000) as security for the related advance payments to suppliers.

The group's trade and other receivables, which are not impaired financial assets, are principally debts in respect of transactions with customers for whom there is no recent history of default. Management does not expect any losses from non-performance by these customers.

Impairment of trade receivables (including contract assets)

The group applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables and contract assets.

To measure the expected credit losses, trade receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due. Contract assets have substantially the same risk characteristics as the trade receivables for the same types of contracts. The group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for contract assets.

The expected loss rates are based on the payment profiles of sales over a period of time before the reporting date and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The group uses judgement in making these assumptions and selecting the inputs to the impairment calculation and adjusts the historical loss rates based on expected changes in these factors. Credit loss allowances include specific provisions against credit impaired individual exposures with the amount of the provisions being equivalent to the balances attributable to credit impaired receivables.

2. Financial risk management - continued

2.1 Financial risk factors - continued

As a result of the outbreak of COVID-19, the Group engaged in routine monitoring of the account activity and repayment patterns of its receivables. For this purpose, customers were subjected to more rigorous monitoring. The Group has not experienced a material shift in repayment patterns attributable to its customers post the COVID-19 outbreak, with no significant deterioration in collection rates detected. The Group has also engaged in monitoring information available on macro-economic factors affecting customer repayment ability, with a view to also assess the actual and projected impact of the pandemic on the business models of the customers serviced by the Group and accordingly on their repayment ability. As a result of these assessments, at 31 March 2021, the Group determined that the level of expected credit losses has not materially changed taking cognisance of the projected impact on the repayment ability of the Group's customers, the repayment pattern actually experienced, and the estimated life of trade receivables.

On that basis, the loss allowance for the group as at 31 March 2021 and 2020 was determined as follows:

	Up to 30 days past due	31 to 60 days past due	61 to 90 days past due	91 to 120 days past due	+121 days past due	Total
31 March 2021						
Expected loss rate	1% - 4%	1% - 5%	1.5% - 7%	2.5% - 12%	30% - 40%	
Gross carrying amount (€)	18,496	47,865	76,391	13,307	1,487,651	1,643,710
Loss allowance (€)	740	526	1,146	371	405,938	408,721
31 March 2020						
Expected loss rate	1% - 4%	1% - 5%	1.5% - 7%	2.5% - 12%	30% - 40%	
Gross carrying amount (€)	-	713,524	1,086,110	544,065	1,868,596	4,212,295
Loss allowance (€)	-	24,319	48,677	41,367	294,358	408,721

The group established an allowance for impairment that represented its estimate of expected credit losses in respect of trade receivables. The individually credit impaired trade receivables mainly relate to a number of independent customers which are in unexpectedly difficult economic situations and which are accordingly not meeting repayment obligations. Hence, provisions for impairment in respect of credit impaired balances with corporate trade customers relate to entities which are in adverse trading and operational circumstances. Reversals of provisions for impairment of credit impaired receivables arise in those situations where customers recover from unfavourable circumstances and accordingly start meeting repayment obligations. The group does not hold any significant collateral as security in respect of the credit impaired assets. The movements in credit loss allowances of these receivables are disclosed separately in profit or loss.

Trade receivables and contract assets are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the group, and a failure to make contractual payments for a period of greater than a year past due.

Impairment losses on trade receivables and contract assets are presented as net impairment losses within operating profit. Subsequent recoveries of amounts written off are credited against the same line item.

2. Financial risk management - continued

2.1 Financial risk factors - continued

Categorisation of receivables as past due is determined by the group on the basis of the nature of the credit terms in place and credit arrangements actually utilised in managing exposures with customers. At 31 March 2021 and 2020, the group's past due but not impaired receivables and the carrying amount of trade receivables that would otherwise be past due or credit impaired whose terms have been renegotiated, were not deemed material in the context of the group's trade receivables figures.

Amounts owed by related parties and other receivables

The group's and the company's receivables also include amounts owed by related parties forming part of the db Group, associates and other related parties (refer to Note 11). The group's treasury monitors intra-group credit exposures on a regular basis and ensures timely performance of these assets in the context of overall group liquidity management. The group assesses the credit quality of these related parties taking into account financial position, performance and other factors. The group takes cognisance of the related party relationship with these entities and management does not expect any losses from non-performance or default.

With respect to the group's and the company's current amounts owed by related parties and other receivables, since such balances are repayable on demand, expected credit losses are based on the assumption that repayment of the balance is demanded at the reporting date. In this respect, the directors considered such balances to have low credit risk and a low risk of default. Accordingly, the expected credit loss allowance attributable to amounts owed by related parties and other receivables was deemed immaterial as at 31 March 2021 and 2020.

The company's non-current amounts owed by subsidiary have been earmarked as additional capital required by the subsidiary, the terms of which will be concluded in the foreseeable future. On this basis, no credit risk has been contemplated.

(c) Liquidity risk

The group is exposed to liquidity risk in relation to meeting future obligations associated with its financial liabilities, which comprise principally the bonds issued to the general public (Note 18), other interest-bearing borrowings (Note 18), lease liabilities (Note 20) and trade and other payables (Note 17). Prudent liquidity risk management includes maintaining sufficient cash and committed credit lines to ensure the availability of an adequate amount of funding to meet the group's obligations.

Management monitors liquidity risk by reviewing expected cash flows, and ensures that no additional financing facilities are expected to be required over the coming year. This is also performed at a central treasury function which controls the overall liquidity requirements of the group within certain parameters. The group's liquidity risk is actively managed taking cognisance of the matching of cash inflows and outflows arising from expected maturities of financial instruments, together with the group's committed bank borrowing facilities and other intra-group financing that it can access to meet liquidity needs. In this respect management does not consider liquidity risk to the group as significant taking into account the liquidity management process referred to above. Furthermore, after considering the financing options available (disclosed in Note 18) and the support from related parties and the shareholder, the directors are confident that the group and the company are in a position to meet commitments as and when they fall due.

2. Financial risk management - continued

2.1 Financial risk factors - continued

The following table analyses the group's and the company's financial liabilities into relevant maturity groupings based on the remaining repayment period at the end of the financial reporting period to the contractual maturity date. The amounts disclosed in the table below are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances as the impact of discounting is not significant.

Group	Less than one year €	Between 1 and 2 years €	Between 2 and 5 years €	Over 5 years €	Total €
At 31 March 2021					
Bonds	2,827,500	2,827,500	8,482,500	70,655,000	84,792,500
Bank borrowings	3,164,826	4,510,802	11,849,810	112,974	19,638,412
Amounts due to Government in relation to purchase of land	4,420,651	2,991,080	6,116,098	162,550,347	176,078,176
Lease liabilities	784,372	733,321	1,542,889	5,190,382	8,250,964
Trade and other payables	19,400,876	-	-	-	19,400,876
At 31 March 2020					
Bonds	2,827,500	2,827,500	8,482,500	73,482,500	87,620,000
Bank borrowings	2,513,800	2,075,004	4,396,248	1,519,435	10,504,487
Amounts due to Government in relation to purchase of land	1,429,571	2,991,080	7,544,670	164,112,856	176,078,177
Lease liabilities	836,350	753,538	1,606,925	4,975,099	8,171,912
Trade and other payables	15,050,782	-	-	-	15,050,782
Company					
At 31 March 2021					
Bank loans	921,338	2,310,000	7,496,798	-	10,728,136
Loan from subsidiary	67,709	67,709	203,126	1,623,518	1,962,062
Trade and other payables	59,712,703	-	-	-	59,712,703
At 31 March 2020					
Loan from subsidiary	-	67,709	203,126	1,691,227	1,962,062
Trade and other payables	53,530,859	-	-	-	53,530,859

2. Financial risk management - continued

2.2 Capital risk management

The group's objectives when managing capital are to safeguard the entity's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the parent company may issue new shares or adjust the amount of dividends paid to shareholders.

The group also monitors the level of capital on the basis of the ratio of aggregated net debt to total capital. Net debt is calculated as total borrowings, as shown in the consolidated statement of financial position, less cash at bank and in hand. Total capital is calculated as total equity, as described below, plus net debt. The aggregated figures in respect of the group are reflected in the following table:

	Group	
	2021	2020
	€	€
Total external borrowings	82,544,321	73,807,722
Less: cash at bank and in hand	(31,819,565)	(25,770,964)
Net debt	50,724,756	48,036,758
Equity – as shown in the consolidated statement of financial position	131,503,769	137,611,512
Total capital	182,228,525	185,648,270
 Net debt/total capital	 27.8%	 25.9%

The level of capital of SD Holdings Limited as reflected in the consolidated statement of financial position is maintained by reference to its respective financial obligations and commitments arising from operational requirements. In view of the nature of the group's activities and the extent of borrowings or debt, the capital level as at the end of the reporting period determined by reference to the consolidated financial statements is deemed adequate by the directors.

2. Financial risk management - continued

2.3 Fair values of financial instruments

Financial instruments not carried at fair value

At 31 March 2021 and 2020 the carrying amounts of cash and cash equivalents, receivables, payables, accrued expenses and short-term borrowings, reflected in the financial statements, are reasonable estimates of fair value in view of the nature of these instruments or the relatively short period of time between the origination of the instruments and their expected realisation. The fair value of balances with related parties which are short-term or repayable on demand is equivalent to their carrying amount.

The fair value of non-current financial instruments for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the group for similar financial instruments. The fair value of the group's non-current payables and bank borrowings at floating interest rates and the fair value of the company's non-current receivables as at the reporting date is not significantly different from the carrying amounts. The carrying amounts of the other financial liabilities as at 31 March 2021, comprising lease liabilities, are reasonable estimates of their fair value as there have not been significant changes in the Group's internal borrowing rate since the date of transition to IFRS 16. The current market interest rates utilised for discounting purposes, which were almost equivalent to the respective instruments' contractual interest rates, are deemed observable and accordingly these fair value estimates have been categorised as Level 2 within the fair value measurement hierarchy required by IFRS 7, 'Financial instruments: Disclosures'. Information on the fair value of the company's bonds issued to the general public is disclosed in Note 18 to the financial statements. The fair value estimate in this respect is deemed Level 1 as it constitutes a quoted price in an active market.

3. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and based on historical experience and other factors including expectations of future events that are believed to be reasonable under the circumstances. In the opinion of the directors, the accounting estimates and judgements made in the course of preparing these financial statements are not difficult, subjective or complex to a degree which would warrant their description as critical in terms of the requirements of IAS 1.

As referred to in Note 4 to the financial statements, the group's land and buildings category of property, plant and equipment is fair valued periodically by the directors on 31 March on the basis of professional advice, which considers current market prices in an active market for all properties.

4. Property, plant and equipment												
Group	Land & buildings	Assets in course of construction and payments on account	Computer equipment	Furniture, fixtures & fittings	Plant, machinery & operational equipment	Motor vehicles	Total

4. Property, plant and equipment - continued

Bank borrowings in the name of group undertakings are secured on the group's land and buildings (refer to Note 18).

Fair valuation of property

The Group's land and buildings, within property, plant and equipment were last revalued by an independent professionally qualified valuer on 31 March 2019. The book value of the property had been adjusted to the revaluation and the resultant surplus, net of applicable deferred income taxes, had been credited to the revaluation reserve in shareholders' equity (Note 15). On 31 March 2020, the directors reassessed the property's valuation in view of the COVID-19 pandemic and resulting restrictions on the hospitality industry, as mandated by the Health Authorities, together with the closure of ports, which have significantly impacted the group's operations. The 2020 valuation reassessment was primarily based on revised projected income streams which took into consideration a lower business activity in the forthcoming years, until reaching the 2019 level of business and assumed normality by 2024. These assumptions resulted in a revised revaluation surplus that was €11 million lower than that recognised in 2019. This difference was accordingly adjusted as at 31 March 2020 and debited to the revaluation reserve, net of applicable deferred income taxes.

As at 31 March 2021, the directors performed a similar assessment to that performed in the preceding year taking into consideration how the COVID-19 pandemic developed and how this impacted the group's business activities. Accordingly, the 2021 valuation reassessment was based on updated projected income streams taking into consideration the experiences of 2020, together with a gradual increase in the business activity in the next few years, until reaching a normalised level of business by 2025. The assumptions for the 2021 assessment did not result in any material impact on the group's property fair value and the directors are of the opinion that the related carrying amount as at 31 March 2021 is not materially different from the respective fair value.

In the current scenario, making financial projections is particularly difficult, in view of the existing uncertainty surrounding the duration of the pandemic, the confidence of the people to get back the trust to travel and/or stay at a hotel, together with any restrictions that may be imposed by Authorities depending on how health matters unfold. The hospitality and leisure operations were one of the hardest hit sectors of the economy; with the group's hotels closed for a number of months as imposed by the Health Authorities. At the date that these financial statements have been authorised for issue, the group hotels have gradually picked up some sustainable business activity. The projections have been updated in view of developments and for the financial year ending 31 March 2022 an EBITDA of 31% of a stable year level was assumed and thereafter, the business activity was extended gradually until reaching the stable year level over the next 4 years (refer to specific details below).

Although the projected cashflows have been prepared in the prevailing economic uncertainties, the Board is of the opinion that the principal assumptions used reflect prudent scenarios as the company and the world within which it operates move gradually back to a new normal lifestyle.

The group is required to analyse non-financial assets carried at fair value by level of the fair value hierarchy within which the recurring fair value measurements are categorised in their entirety (Level 1, 2 or 3). The different levels of the fair value hierarchy have been defined as fair value measurements using:

- Quoted prices (unadjusted) in active markets for identical assets (Level 1);
- Inputs other than quoted prices included within Level 1 that are observable for the asset, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2);
- Inputs for the asset that are not based on observable market data (that is, unobservable inputs) (Level 3).

4. Property, plant and equipment - continued

The group's revalued land and buildings, consist principally of the db Seabank Resort & SPA and the db San Antonio Hotel & SPA, being operational property that is owned and managed by the respective group undertakings. The recurring property fair value measurements at the end of each financial period presented use significant unobservable inputs and are accordingly categorised within Level 3 of the fair valuation hierarchy.

The group's policy is to recognise transfers into and out of fair value hierarchy levels as of the beginning of the reporting period. There were no transfers between different levels of the fair value hierarchy during the current and preceding financial year.

A reconciliation from the opening balance to the closing balance of property for recurring fair value measurements categorised within Level 3 of the fair value hierarchy, for the current and preceding financial year, is reflected in the table above.

Valuation processes

The valuation of the property is performed regularly on the basis of valuation reports prepared by third party qualified valuers. The Group's and company's policy is to revalue land and buildings at least every three years. These reports are based on both:

- information provided by the group which is derived from the respective group undertaking's financial systems and is subject to the entity's overall control environment; and
- assumptions and valuation models used by the valuer; with assumptions being typically market related and based on professional judgement and market observation.

The Group's Board of directors review the valuation report and then consider it as part of its overall responsibilities. At the end of a reporting period, when an external valuation is not performed, the directors assess whether any significant changes or developments have been experienced since the last external valuation. This analysis is usually supported by an assessment of the Group's projected income streams.

4. Property, plant and equipment - continued

Valuation techniques

The external valuation of the Level 3 property as at 31 March 2019 has been performed using the discounted cashflow approach. Similarly, the assessments performed by the directors as at 31 March 2020 and 2021 were also performed using the discounted cashflow approach, as discussed earlier. In view of a limited number of similar or comparable properties and property transactions, comprising sales or rentals, in the local market, the valuation has been performed using unobservable inputs. The significant inputs to the approach used are generally those described below:

- Discounted cash flow ("DCF") approach: considers the free cash flows arising from the projected income streams expected to be derived from the operation of the property, discounted to present value using an estimate of the weighted average cost of capital that would be available to finance such an operation. The significant unobservable inputs utilised with this technique include:

Earnings before interest, tax, depreciation and amortisation (EBITDA)	based on projected income streams less operating expenditure necessary to operate the hotels, but prior to depreciation and financing charges.
Growth rate	based on management's estimated average growth of the respective company's EBITDA levels, mainly determined by projected growth in income streams.
Discount rate	reflecting the current market assessment of the uncertainty in the amount and timing of projected cash flows. The discount rate reflects the estimated weighted average cost of capital that would be available for financing such an operation. The discount rate is based on an assumed debt to equity ratio; estimation of cost of equity is based on risk free interest rates adjusted for country risk and equity risk premium adjusted for entity-specific risk factor; estimation of cost of debt is based on risk free interest rates adjusted for country risk and assumed credit spread.

4. Property, plant and equipment - continued

Information about fair value measurements using significant unobservable inputs (Level 3):

As at 31 March 2021

Description by class based on highest and best use	Fair value as at year end €000	Valuation technique	Significant unobservable input	Range of unobservable inputs
Current use as commercial premises (hotel operations)	181,000	DCF approach	EBITDA (aggregate for both hotels)	€7,614,000 in 2022 increasing gradually until reaching €20,147,000 in 2025
				Growth rate 2% after 2024
				Discount rate 7.9% (post-tax)

As at 31 March 2020

Description by class based on highest and best use	Fair value as at year end €000	Valuation technique	Significant unobservable input	Range of unobservable inputs
Current use as commercial premises (hotel operations)	187,500	DCF approach	EBITDA (aggregate for both hotels)	€4,109,000 in 2021 increasing gradually until reaching €20,405,000 in 2024
				Growth rate 2% after 2024
				Discount rate 7.6% (post-tax)

With respect to the DCF approach, an increase in the projected levels of EBITDA and growth rate would result in an increased fair value of the property, whereas a higher discount rate would give rise to a lower fair value.

At 31 March 2021 and 2020, the directors consider the current use of the properties to be equivalent to the highest and best use.

If the land and buildings were stated on the historical cost basis, the amounts would be as follows:

	2021 €	2020 €
Cost	71,473,436	70,905,189
Accumulated depreciation	(5,274,990)	(4,838,526)
Net book amount	66,198,446	66,066,663

5. Investment property

	Group	
	2021	2020
	€	€
Year ended 31 March		
Opening cost and carrying amount	74,898,044	71,553,630
Additions resulting from subsequent expenditure	3,151,818	3,344,414
Closing cost and carrying amount	78,049,862	74,898,044

The group's investment property represents property title in the name of DB San Gorg Property Limited, a wholly owned subsidiary of the parent company. DB San Gorg Property Limited entered into a 99 year concession agreement with the Government of Malta and the Government Property Department on 1 February 2017 for the acquisition of three portions of land having a total surface area of circa 23,975sqm. The said land is located in St Julian's. This property, subject to the securing of all necessary development permits, is earmarked as a mixed use development encompassing a five star hotel, residential tower, shopping mall, large underground car park and other amenities to complement the project (refer to Note 34).

The contract of acquisition of the emphyteutical grant and related acquisition costs are payable over an extended period of time and was therefore discounted to its present value of €60.1 million at the date of purchase. The rate applied in discounting the future outflows to present value is 3.5%, based upon the current market interest rate that is available to the group.

During the current financial year, the said subsidiary continued incurring subsequent expenditure on the acquired land and related project. The additions, disclosed in the table above, also include capitalised borrowings costs of €1,748,640 (2020: €1,737,997) mainly representing the imputed interest component on the amounts due to the Government (refer to Note 17) and other capitalised interest costs of €329,199 (2020: €282,543). A weighted average capitalisation rate of 3.5% (2020: 3.5%) was utilised in this respect.

As at 31 March 2021 and 2020, following an assessment by the directors, the fair value of the property is deemed to fairly approximate its carrying amount.

6. Intangible assets

	Group	
	2021	2020
	€	€
Franchise license rights		
Year ended 31 March		
Opening net book amount	909,127	287,605

8. Investments in associates - continued

Disclosure requirements emanating from IFRS 12 'Disclosure of interests in other entities'

The principal and significant associates of the group are Malta Healthcare Caterers Limited and Sky Gourmet Malta Limited. The main activities of the Malta Healthcare Caterers Group, is the provision of healthcare catering services to hospitals and retirement homes, together with the provision of nursing, medical and clinical services; whilst Sky Gourmet Malta Limited's principal activity is the provision of catering and commissary services to airlines operating from Malta. These investments provide strategic partnerships for the group within business sectors which are targeted by the group for diversification or consolidation purposes. The principal places of business for both associates are based in Malta.

Associates are measured using the equity method in accordance with the group's accounting policy and there are no contingent liabilities relating to the group's interest in the associates.

Set out below are the summarised financial information of the group's principal associates, as presented in the respective financial statements.

Summarised balance sheets

	Malta Healthcare Caterers Limited		Sky Gourmet Malta Limited	
	As at 31 March		As at 31 March	
	2021	2020	2021	2020
	€	€	€	€
Non-current assets	32,943,773	28,477,941	88,668	163,207
Current assets	49,262,118	40,585,544	2,340,382	3,909,498
Non-current liabilities	(34,153,230)	(23,290,968)	-	(24,577)
Current liabilities	(31,243,926)	(33,558,564)	(1,194,784)	(2,592,549)
Net assets	16,808,735	12,213,953	1,234,266	1,455,579

8. Investments in associates - continued

The carrying amount of these investments is lower than the group's share of the net assets reflected above as a result of fair value adjustments made at the time of acquisition and the fact that the share of results for the year of acquisition was not a full financial year.

Summarised statements of comprehensive income

	Malta Healthcare Caterers Limited		Sky Gourmet Malta Limited	
	Year ended 31 March	15 months ended 31 March	Year ended 31 March

The income statement reflects the following amounts relating to leases:

	2021 €	2020 €
Amortisation charge of right-of-use assets	661,230	463,609
Interest expense (included in finance costs) (Note 26)	320,352	196,258
Expense relating to variable lease payments not included in lease liabilities (included in administrative expenses) (Note 22)	41,788	315,472
Rent rebates in relation to COVID-19 (Note 20)	(344,137)	-

10. Deferred taxation

Deferred income taxes are calculated on temporary differences under the liability method and are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled based on tax rates (and tax laws) that have been enacted by the end of the reporting period. The principal tax rate used is 35%, with the exception of deferred taxation on the fair valuation of non-depreciable property which is computed on the basis applicable to disposals of immovable property, i.e. tax effect of 10%.

	Group	
	2021	2020
	€	€
Year ended 31 March		
At beginning of year	(18,762,326)	(20,894,857)
<i>Credited/(charged) to profit or loss (Note 27):</i>		
Unabsorbed capital allowances	2,462,932	19,861
Unutilised investment tax credits	7,917	(2,085,089)
Unutilised trading losses	2,682,552	-
Temporary differences on intra-group transactions	-	9,266
Temporary differences on property, plant and equipment and provisions for credit loss allowances	(108,661)	180,780
Temporary differences on right-of-use assets	41,076	49,081
Realisation through asset use	76,940	108,632
Unrecognised deferred tax in prior year	(2,905)	-
<i>Charged to other comprehensive income (Note 15):</i>		
Deferred tax on movements in revaluation surplus on land and buildings arising during the year (Note 15)	-	3,850,000
At end of year	(13,602,475)	(18,762,326)

Deferred taxation is principally composed of deferred tax assets and liabilities which are expected to be recovered and settled after more than 12 months. Deferred tax assets have been recognised in the financial statements on the basis that the directors of the respective companies are of the opinion that it is probable that future taxable profits will be available to utilise such assets.

10. Deferred taxation - continued

The balance at 31 March represents:

	7,198,883	10,803,758	2,466,453	2,099,864

11. Trade and other receivables - continued

Non-current amounts owed by subsidiaries include an amount of €17,000,000 relating to the consideration receivable from the sale of intellectual property to DB Group Franchising Limited. These amounts are unsecured, interest free and have been earmarked as additional capital required by the subsidiary, the terms of which will be concluded in the foreseeable future. Other non-current amounts owed by subsidiaries of €9,321,039 (2020: nil) are unsecured, subject to interest of 2.5% plus 3-month Euribor, subject to a subsidy of 2.4% for the first two years, in line with the COVID-19 Guarantee Scheme supported by the Malta Development Bank (MDB). Accordingly, the effective interest rate as at 31 March 2021 is of 0.1% and are repayable as follows:

	Company	
	2021	2020
	€	€
Between 1 and 2 years	2,098,005	-
Between 2 and 5 years	7,223,034	-
	9,321,039	-

Non-current other receivables represent deposits effected by a group undertaking to lessor under operating lease arrangements. This is refundable at the end of the lease terms in accordance with the respective lease arrangements.

As at 31 March 2021, advance payments to suppliers are supported by collateral in the form of bank guarantees for an amount of €1,000,000 (2020: €1,000,000) as security for the related services that are due to a subsidiary.

Included in other receivables is a payroll grant receivable from the Government amounting to €171,915 (2020: €234,078) relating to the COVID-19 pandemic schemes.

12. Inventories

15. Revaluation reserve

	Group	
	2021	2020
	€	€
Year ended 31 March		
At beginning of year	74,354,642	81,706,384
Reversal of revaluation surplus on land and buildings arising during the year (Note 4)	-	(11,000,000)
Deferred tax on reversal of revaluation surplus on land and buildings arising during the year (Note 10)	-	3,850,000
Transfer upon realisation on through asset use, net of deferred tax	(125,678)	(201,742)
At end of year	74,228,964	74,354,642

The revaluation reserve represents the revaluation surplus arising on the valuation of the group's land and buildings and is non-distributable.

16. Other reserves

	Group	
	2021	2020
	€	€
Capital redemption reserve	11,628,279	11,628,279
Incentives and benefits reserve	1,301,885	1,301,885
	12,930,164	12,930,164

The capital redemption reserve represents a sum equal to the nominal amount of reference shares redeemed by a subsidiary in accordance with Article 115 of the Maltese Companies Act (Cap. 386). The capital redemption reserve may be applied in paying up unissued shares to be issued to members as fully paid bonus shares. These redemptions took place in prior years. The preference shares redeemed were attributable to non-controlling interest.

The incentives and benefits reserve represents transfers effected by a subsidiary for the net amount of profits subject to income tax at a reduced rate of tax, in accordance with Articles 24B and 36 of the Business Promotion Act. No transfers to the incentives and benefits reserve have been made during the current and the preceding financial years, as no income was subject to tax at reduced rates. Such profits are set aside for the exclusive purpose of financing the upgrading projects within the qualifying company as approved by Malta Enterprise Corporation in accordance with Article 6 of the Business Promotion Act. The incentives and benefits reserve is not distributable and will be retained for a period of eight years after which it can be distributed by means of a bonus issue.

	52,433,835	50,685,196

17. Trade and other payables - continued

The company's amounts owed to subsidiaries represent financing obtained by the parent company from other group undertakings to finance various group projects including the acquisition of Hotel San Antonio Limited in prior years and subsequent developments at the same hotel. Such advances are unsecured and repayable on demand. However, the respective subsidiaries have undertaken not to request repayment of amounts due until alternative financing is available. Included in such advances are offsettable amounts of €1,488,101 (2020: €1,488,101) owed by a subsidiary to the parent company which are subject to interest at 4.8% (2020: 4.8%). All the other amounts are interest free.

Total borrowings	82,544,321	73,807,722	11,488,100	1,488,101

Bonds

By virtue of an offering memorandum dated 27 March 2017, SD Finance plc (the Issuer) issued €65,000,000 bonds with a face value of €100 each. The bonds have a coupon interest of 4.35% which is payable annually in arrears, on 25 April of each year. The bonds are redeemable at par and are due for redemption on 25 April 2027. The bonds are guaranteed by SD Holdings Limited, which has bound itself jointly and severally liable with the issuer, for the repayment of the bonds and interest thereon, pursuant to and subject to the terms and conditions in the offering memorandum. The bonds were admitted on the Official List of the Malta Stock Exchange on 4 May 2017. The quoted market price as at 31 March 2021 and 2020 for the bonds was €101.50 and €98 respectively, which in the opinion of the directors fairly represents the fair value of these financial liabilities. At the end of the current reporting period, bonds with a face value of €535,000 (2020: €535,000) were held by a company director.

In accordance with the provisions of the prospectus, the proceeds from the bond issue have been advanced by the Issuer to SD Holdings Limited (the company's parent undertaking and guarantor of the bonds) and to Hotel San Antonio Limited and Seabank Hotel and Catering Limited (both fellow subsidiaries of the Issuer). The principal purposes for these advances were the re-financing of existing banking facilities of the respective borrower, the financing of the redemption of the redeemable preference shares of Seabank Hotel and Catering Limited (refer to Note 16) and for the general corporate funding purposes of the db Group.

18. Borrowings - continued

The bonds are measured at the amount of the net proceeds adjusted for the amortisation of the difference between the net proceeds and the redemption value of such bonds, using the effective yield method as follows:

	2021 €	2020 €
Original face value of bonds issued	65,000,000	65,000,000
Bond issue costs	(924,036)	(924,036)
Accumulated amortisation	325,046	238,735
Closing net book amount of bond issue costs	(598,990)	(685,301)
Amortised cost and closing carrying amount of the bonds	64,401,010	64,314,699

Bank borrowings

During 2021, SD Holdings Limited successfully applied for loans through the COVID-19 Guarantee Scheme supported by the Malta Development Bank (MDB). These loans were then advanced to various components within the db Group at the same terms and conditions as issued by the respective bank. In this respect, SD Holdings Limited advanced €5,324,490 to Seabank Hotel and Catering Limited, €3,287,766 to Hotel San Antonio Limited and €1,387,743 to Sea Port Franchising Limited. The loan is subject to interest of 2.5% plus 3-month Euribor. However, in line with the MDB COVID Guarantee Scheme, the loan benefits from a subsidy of 2.4% for the first two years. Accordingly, the effective interest rate as at 31 March 2021 is of 0.1%.

The group's and the company's banking facilities as at 31 March 2021 amounted to €82,129,091 (2020: €72,648,508) and €10,500,000 (2020: €500,000) respectively. The group's bank facilities are mainly secured by:

- (a) special hypothecs over the group's property up to an amount of €75,600,000 (2020: €75,600,000);
- (b) general hypothecs over the group's present and future assets up to an amount of €85,500,000 (2020: €85,500,000);
- (c) guarantees given by the shareholder;
- (d) pledges over specific insurance policies of group undertakings;
- (e) pledges over the shareholder's life insurance policies;
- (f) letters of undertaking.

The interest rate exposure of the bank borrowings is at floating rates and the weighted average effective interest rates as at the end of the financial reporting period are as follows:

	Group		Company	
	2021	2020	2021	2020
Bank overdrafts	4.0%	4.0%	-	-
Bank loans	3.9%	3.9%	-	-

18. Borrowings – continued

Maturity of non-current bank borrowings:

	Group		Company	
	2021 €	2020 €	2021 €	2020 €
Between 1 and 2 years	4,087,481	1,851,242	2,098,005	-
Between 2 and 5 years	11,301,742	3,964,870	7,223,034	-
Over 5 years	112,599	1,485,051	-	-
	15,501,822	7,301,163	9,321,039	-

Loan from subsidiary

The company's non-current loans from subsidiary amounting to €1,488,101 consist of advances from SD Finance plc, out of the proceeds of the bonds issued by the same company. The proceeds of the bond issue have been advanced to SD Holdings Limited and other companies forming part of the db Group. SD Holdings Limited utilised these advances primarily for re-financing its existing banking facilities. These loans are subject to interest at a fixed interest rate of 4.55%, with an additional renewal fee, which shall be charged on the loans at a floating rate at the discretion of the directors of the Issuer. As at the end of the current reporting period, the element of the floating rate interest was 0.28% (2020: 0.27%). The loans are unsecured and repayable by not later than 10 April 2027.

1 April 2020	6,187,189	104,796	6,291,985
Additions	653,440	82,694	736,134
Impact of derecognition of leased assets	-	(18,414)	(18,414)
Interest charges	316,803	3,549	320,352
COVID-19 lease concessions	(344,137)	-	(344,137)
Payments effected - total cash outflows	(439,946)	(37,464)	(477,410)
As at 31 March 2021	6,373,349	135,161	6,508,510
Non-current	5,822,913	104,308	5,927,221
Current	550,436	30,853	581,289
Total lease liabilities	6,373,349	135,161	6,508,510

These lease liabilities are measured at the present value of the remaining lease payments, discounted using the interest rate implicit in the lease arrangement. The discount rate applied to the lease liabilities was 5% which is in line with prior year.

The contractual undiscounted cash flows attributable to lease liabilities as at 31 March are analysed in Note 2.1 (c).

As a result of the COVID-19 pandemic, rent concessions have been granted to lessees. Such concessions might take a variety of forms, including payment holidays and deferral of lease payments. In May 2020, the IASB made an amendment to IFRS 16 - Leases which provides lessees with an option to treat qualifying rent concessions in the same way as they would if they were not lease modifications. The group has applied this practical expedient for all qualifying lease concessions and, as a result, has accounted for such concessions as variable lease payments in the period in which they are granted.

21. Revenue

The group's entire revenue is derived locally mainly from hospitality, leisure and ancillary activities.

Inventories	428,950	(544,576)	-	-
Trade and other receivables	4,666	6,489,448	312,371	(16,860,835)
Trade and other payables	(3,371,277)	(2,634,410)	2,181,844	16,370,047
Cash generated from operations	189,922	28,706,783	6,501,620	16,485,996

Net debt reconciliation

Other than as disclosed in Note 18 'Borrowings', with respect to the amortisation of bond issue costs, all the movements in the group's and the company's net debt mainly relate only to cash flow movements and disclosed as part of the financing activities in the statements of cash flows.

31. Commitments

Capital commitments

Commitments for capital expenditure not provided for in these financial statements are as follows:

	Group	
	2021 €	2020 €
Authorised but not contracted for	165,000,000	2,101,509

31. Commitments - continued

Operating lease commitments – where a group undertaking is a lessor

A subsidiary undertaking had non-cancellable operating leases receivable, as follows:

	Group 2021 €	2020 €
Less than one year	159,566	297,998

Operating lease receivables relate to property concessions.

32. Contingencies

At 31 March 2021, the group's and the company's major contingent liabilities were:

- (a) Guarantees given by the parent company in respect of bank facilities of group undertakings for an amount of €72,900,000 (2020: €72,900,000). At 31 March 2021, the parent company also gave guarantees for an amount of €7,500,000 (2020: €7,500,000) jointly with other group undertakings in respect of bank facilities of a subsidiary.
- (b) Guarantees given by a group undertaking in respect of bank facilities of associates for an amount of €3,435,000 (2020: €3,435,000).
- (c) Undertakings given by the parent company to provide the necessary financial support to subsidiaries and associates so as to enable these entities to meet their liabilities and any other obligations as they fall due and to continue as a going concern.
- (d) Uncalled share capital amounting to €5,590 (2020: €5,590) relating to shares subscribed in associates by a group undertaking and uncalled share capital amounting to €960 (2020: €960) relating to shares subscribed in subsidiaries by the parent company.
- (e) Guarantees of €693,650 (2020: €693,650) issued by the group's bankers, on behalf of group undertakings in favour of the Planning Authority, in the ordinary course of business.
- (f) Guarantees and performance bond amounting to €250,000 (2020: €250,000) given to the Commissioner of Land with respect to the acquisition of the land title.
- (g) Guarantees of €108,500 (2020: €108,500) issued by the group's bankers, on behalf of group undertakings in favour of the Environment and Resources Authority, in the ordinary course of business.
- (h) Guarantees of up to a maximum of €134,606 (2020: €89,606) issued by group undertakings to various third parties in the ordinary course of business.

33. Related party transactions

Parties are considered to be related if one party has the ability to control the other party and exercise significant influence over the other party in making financial and operating policy decisions.

The entities constituting the db Group are ultimately owned by Mr Silvio Debono who is considered to be the group's ultimate controlling party. Accordingly, all entities owned or controlled by Silvio Debono, the associates of the group and the group's key management personnel are the principal related parties of the db Group.

In the ordinary course of their operations, group entities provide services to associates and other related parties mentioned above for trading services and in turn group entities also purchase services from such related parties. The group's related party transactions also include financing transactions, principally advances with associates and other related parties.

In the opinion of the directors, disclosure of related party transactions, which are generally carried out on commercial terms and conditions, is only necessary when the transactions effected have a material impact on the operating results and financial position of the group. The aggregate invoiced amounts in respect of a considerable number of transaction types carried out with related parties are not considered material and accordingly they do not have a significant effect on these financial statements.

Except for transactions disclosed or referred to previously, the following significant operating transactions have a material effect on the operating results and financial position of the group:

	Group 2021	2020
	€	€
Income from goods and services		
Management fees charged to associates (included in 'Other operating income')	-	1,048,766

Year-end balances with related parties are disclosed in Notes 11, 17 and 18 to these financial statements. Such balances are unsecured, interest free and repayable on demand unless otherwise stated in the respective notes.

Key management personnel comprises the directors of the parent company and the directors of the other group undertakings. Key management personnel compensation, consisting of the parent company's directors' remuneration has been disclosed in Note 28. In addition to the amounts disclosed in Note 28, other key management personnel compensation amounted to €28,911.

34. Events subsequent to the end of the reporting period

During the current financial year, DB San Gorg Property Limited submitted a downscaled development plan for the City Centre project and after the end of the reporting period the Planning Authority approved the revised development plan, which however is subject to an appeal process.

35. Statutory information

SD Holdings Limited is a limited liability company and is incorporated in Malta.
